Experiences

EPAM, Java Mentoring Program— Mentee

2019 - 2020

In this six+ month long program I've learnt the basic skills (agile methodologies, CI, clean code, Java under the hood, etc.) to be a useful member of a Java developer team.

Mobile App Development — Freelancer

2018 - 2019

The main features were: streaming soundtracks, managing personal notes, tracking progress, basic gamification (achievements), push-notifications and pulling data from a server.

The application was based on Ionic Framework and Google Firebase.

Logiscool — Teacher

2016 - 2018

I taught programming methodologies and thinking to 9-11-year-old kids with Logiscool's kid-friendly programming language and UI.

I've held summer camps for three years and taught two classes for two school years.

Studies

Computer Engineering - BSc — In progress

2018 -

Currently passive semester.

Bonyhádi Petőfi Sándor ev. High School — Graduation

2012 - 2018

Advanced mathematics class.

Programming Skills

Advanced:
